PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building production-grade government enterprise applications using Angular, Node.js, Express, NestJS, Fastify, and PostgreSQL. Built secure authentication systems, RBAC, REST APIs, workflow automation, and responsive dashboards serving thousands of users. Passionate about scalable backend architecture, clean code, and high-performance web applications.

EXPERIENCE

Software Development Engineer Intern | IDCLE Tech LLP

Oct 2025 – April 2026

Andheri, Mumbai

- **Delivered production features** for 2 government enterprise portals (IWBMS & RETMS) used by 10,000+ registered stakeholders across Maharashtra.
- **Architected OTP-based login system** (6-digit, 5-min TTL via SMS gateway) using Node.js + JWT, eliminating password-only entry points and meeting state government security compliance.
- **Designed 3-tier RBAC system** (Citizen → Samiti Approver → Department Admin) with dynamic route guards across 15+ protected screens and API endpoints.
- **Built responsive Angular UIs** with lazy loading and optimized API calls, achieving ~25% reduction in average screen-load time across key modules.
- **Integrated multi-step benefit-claim flows** handling 500+ daily form submissions with server-side validation and real-time status tracking.

Projects -

IWBMS — Maharashtra Government Labor Department

RETMS — Brihanmumbai Municipal Corporation (BMC)

TECHNICAL SKILLS

Frontend: Angular (primary), Prime Ng, HTML5, CSS3, TypeScript, JavaScript

Backend: Node.js, Express.js, Fastify, NestJS, REST API Design, JWT, OTP Authentication

Database: PostgreSQL (schema design, query optimization), MySQL

Concepts: RBAC, MVC Architecture, Agile/Scrum, State Management, UI/UX Integration, Debugging

Tools: Git, GitHub, VS Code, Postman

EDUCATION

B.Tech — Computer Science & Engineering

Jul 2021 – Jun 2025

Dr. APJ Abdul Kalam Technical University, Lucknow, India
